1 Scope

This logbook summarises all publications of the European C-ITS Point of Contact (CPOC) via the CPOC-WEB Distribution centre (DC) available at <https://cpoc.jrc.ec.europa.eu/> implemented according to the CPOC protocol.

For each TLM Environment (TLM Level 0, TLM Level 1 and TLM Level 2) the published TLM Certificates and ECTLs are recorded in a dedicated logbook.

This is the logbook for the L2 Environment. As defined by the Commission Expert Group on C-ITS Security (E01941), the "Level 2" (L2) Environment of the TLM is the production environment fully compliant with the C-ITS Security and Certificate Policies for the deployment of certified C-ITS implementations.

For each publication a parsed version of the Certificate as well as a description of the main changes/updates are given.

Each ECTL and TLM is labelled with a version number, which is a consecutive number for the purpose of this document. The date of each TLM Certificate and ECTL indicates the date of creation of the cryptographic file.

This logbook only serves as additional input to the actual cryptographic TLM Certificates and ECTL files to ease their processing and contextual understanding.
